Listen to some sweet Crushlands tunes as you read about the game: fight and tame alien monsters, craft resources in threatened weapons, and the friendship of the strange locals, and go to the chin with the crazy world. Now with 2 player couch co-op! Crashlands is an adventure-driven RPG led by an epic story From the moment of play begins you'll be pushing PELVIS-FIRST into a crazy tale complete with a cast of bloated characters. What's the use of these characters if they can do things for themselves? The Crushlands are cast completely helpless, thus providing you with endless pursuit opportunities. Make tools and stations to smash the planet's resources, discover new recipes in the process, and then build all things as you explore the world. Craftables get ever more detailed and silly: harvest using bombs, put your pet on the laser steering wheel, and become the master of time and space. And you know what crafting means: inventory management! Oh, oh! Spend countless hours organizing their countless chests all filled with countless items and mostly useless. Oh wait not to suck, so you don't have to do any of it in Crashlands. There is no inventory management: you will always have the things you really want when you want them. Sure, you can create armor and weapons. These are just standard RPG things but you can also enhance your bad assery with a set of tools that shoot, pull lightning out of the ether, poison the crap out of everything, make you fly, and even adjust the very flow of space-time. Each creature in Crashlands has a unique attack narrative you'll need to learn so that you can defeat him in battle. Do the 'crashlands' death dance to win battles and get those painstaking creature parts for your craft. Chiefs fighters add more spice to your near-death experiences. Not only can you harvest the formulation components of the creatures, you can also find the creature's eggs. Take that egg to your base, give it some time to embrace it, and hatch your baby's own death machine. Use your new pet as an arm candy, chum in battle, and even as a crafting station! The Crushlands are made up of three infinitely dynamic, procedurally generated areas: Savannah, Pug, and Tundra. Each has a cast of creatures, resources and living things for you to control. Well, we lied about being infinite but seriously, (The Crashlands) is really big and it will take years to fully explore it. Obviously you want an epic base to hold your huge collection of monsters, drafting stations, and decorative pillows. AW YEAH, BASEBUILDING, where you slowly turned around, open and repeatedly closed and drilled through your enormous stock, assembling your masterpiece dramatically. Hey. Building a base in (Crushlands) is not bad it's more like a pop finger pad just open the construction mode, enjoy the soothing muzak, and immediately build your living spaces! So, Crashlands is a crafting game without inventory, delicious construction mode, epic story, tame pets, and a glorious combat system. Isn't that enough for you! What if we throw in 2 player couch co-op, across the cloud platform, fishing? Do. The Crushlands have been in development for almost two years. It started out as a catalytic escape for the three brothers behind Butterscotch. After Sam, the artist, was diagnosed with cancer in November 2013. A month before the game was launched, Sam
